MVP PLAN / 03

A personal travel planner.

A useful first release, with the evidence and costs behind every next step.

PERSONAL TRAVEL PLANNER · VERSION 3 · $20 MONTHLY APP BUDGET

FOR	FIRST RELEASE	PILOT USAGE
Independent travellers	**Plan a day offline**	**100 itinerary requests / month**

CHECKS OPEN

01 / THE FIRST RELEASE

One day. A journey worth taking.

Use saved places and opening hours on the device, review the route and save the itinerary locally. Optional encrypted backups can sync when connected.

01

Start with saved places

Choose a day, interests and the places already on your device.

02

Shape the day

Arrange visits around the saved opening hours. This capability still needs proof.

03

Make it yours

Change a stop and review the revised itinerary.

04

Keep the plan

Save locally. Encrypted online backups stay optional.

YOUR NEXT DECISION

Prove the fit. Then price the plan.

A local engine does not mean zero cost. Confirm opening-hours support and collect the remaining prices before approving this version.

02 / ARCHITECTURE TO CHECK

Every piece has a purpose.

01
Saved places
On your device

02
Offline routes
DemoRoute · to check

03
Your itinerary
Saved locally

04
Optional backup
StoreBox · when online

The offline engine is a candidate, pending proof that it respects saved opening hours. Optional backups must not block offline routing.

ROUTE PLANNING / OPEN

DemoRoute Local

Runs offline on macOS and Windows. No source yet confirms opening-hours handling, so this choice is not yet recommended.

“Routes are calculated fully offline on macOS and Windows.”

demoroute.example/offline · read 25 Oct 2026

Supports offline route planning; says nothing about opening hours.

OPTIONAL ONLINE BACKUPS / SUPPORTED

StoreBox Encrypted

Saved itineraries and backups are encrypted at rest. Re-checked and held for optional backups when online.

“Saved itineraries and backups are encrypted at rest.”

storebox.example/security · read 23 Oct 2026

Supports encryption for stored itineraries and backups.

03 / COST AT YOUR USAGE

A small pilot. A visible budget.

MONTHLY APP RUNNING COST

Not yet costed.

No verified price for the offline route engine. The cloud estimate is withdrawn, not reused. Budget kept: $20 a month. Still to price: the offline engine, maintenance and any optional online services.

04 / STILL OPEN

What would change the decision?

01 / Opening-hours support

A source or test showing that DemoRoute Local respects saved opening hours.

02 / Offline running costs

Verified prices for the engine, maintenance and any optional online services.

03 / Optional trip summaries

A verified source excluding trip summaries from model training. The feature stays off until then.

Try a route with a closed attraction if you want proof beyond the vendor’s words. Your team or coding tools build the application from this plan.

Big idea. Clear next move.

Resolve the offline capability and cost checks before approval. Optional summaries stay off pending the privacy check.
